ULTRA WIDE
p36

EOS SYSTEM

36 Ultra wide-angle

Christopher Head explains why he uses extreme wide-angle lenses to capture dramatic images of his subjects.

50 Back-up battery

Did you know that there are two batteries in your EOS camera? The main battery looks after the prime camera functions, while the secondary battery deals with date and time.

61 On reflection

The EOS 77D has a pentamirror viewfinder, while the EOS 80D has a pentaprism. We discuss the difference between the two and which is better.

NEW PRODUCT

21 Latest equipment

Designed for macro and close-up photography, the EF-S 35mm f2.8 Macro IS STM features Canon's unique built-in Macro Lite technology.

CANON CPS

22 CPS photo session

EOS magazine subscribers joined Canon Professional Service members on a Beauty and Print Experience Day.

HDR MODES
p42

CANON SPEEDLITES

62 Freeze flash

Andrew Fusek Peters takes us through his journey of experimentation with high speed flash to photograph wildlife in his back garden.

EOS PROJECT
p14

REGULAR FEATURES

06 World of EOS

Canon news, developments and winning images.

74 Ask the EOS experts

Readers' questions answered.

78 EOS equipment data

An overview of past and present EOS accessories.

82 Forum feedback

So what do you do with your images? Print them, display them digitally, or neither of these?

PHOTO SUBJECTS

14 Hi-tech Tokyo

Intrigued by Japanese culture from a young age, Sam Pritchard indulges in the opportunity to photograph Tokyo's futuristic architecture.

CAMERA FUNCTIONS

26 Manual focus

Even though your EOS camera has a fast and effective autofocus, there are occasions when you might want to focus manually. Canon provides features to help with this.

42 HDR modes

High Dynamic Range imaging involves combining images taken at different exposures into a single final HDR image. While you can do this using Canon's DPP software, some EOS models allow you to merge images in-camera.

MANUAL FOCUS
p26

CAMERA SETTINGS

52 Balancing act

We look at the new white balance option on recent EOS cameras and offer a refresher course on the settings available to all EOS photographers.

69 Aspect ratios

Changing the aspect ratio on your camera could be important if you want to improve your composition or print your images.

Freeze flash

see page 62

Andrew Fusek Peters says, "The light from the Speedlites caused a disturbance and the robin made ready to fly. It was this action that I caught on camera."

ON THE COVER
& P62

◀ EOS-1D X, EF 500mm f4L IS II USM lens with Extender 1.4x Mark III (giving 700mm focal length), 1/4000 second at f5.6, ISO 1600, Speedlites.
